Keith Anthony Washington App.# 10/632,323
Examiner Siegfried E. Chencinski

06-11-07

ATTN: Management

Just to let you know, I have no intention of "Abandonment" of The ADDRESS BILLING SYSTEM. This Office Action is illegal. It is obvious what is going on here. The examiner was hoping new matter would be added so he could legally reject the application. But no new matter was added. So he did, and said anything he could, and stopped the application process short, and illegally. This O A would never hold up in court. The cited reference is improper, and illegal, and he knows it. That is why he is mad. He has no right to make me start from ground zero, and pay a third filing fee, and wait more years.

I am getting ready to launch a major mailing campaign. I am mailing both patent applications, and O As, to every member of Congress. And I am sure there are several news publication that would be interested in my life story. If I do not receive a perfectly legal O A, by a new and competent examiner. My life story is going out to all of the major newspapers. Which consist of, moving to Oakland, government fraud, Congresswoman Barbara Lee, and former Congressman Ronald Dellums. This story is going to cause a major Earthquake, for the U.S. Patent Office, and Barbara Lee. It is going to be a pure political disaster. So heads will roll!. The American public needs to know how this office treats people who file patent applications on major inventions "Without" an attorney.

If all of the above fails, I will give half of my ownership rights to a good lawyer. "We" will sue the patent office for denying the world's first fraud proof billing system a patent, for illegal reasons. I would love to hear the examiner say in court, that he did not see anything patentable. He is either a liar, or a idiot, or both. The patent office is refusing to process the application because of what it is worth. The employees are doing a dam good job of ruining the integrity of the office.

The true reason people need to hire patent attorneys, is to avoid illegal activity by the employees. Everything that happens to my application is a permanent part of American History, and the public will know about it. You should think about this before you mail me anymore illegal documents.

Sincerely

Keith A Washington
